Assignments					
Conduct response activities per the Facility Response Plan.					
Consider wind speed, direction and heading to manage smoke.					
Implement IR thermal imaging via UAS to determine source and extent of fire. Coordinate with personnel blocking valve(s) and controlling source(s). Determine the condition to isolate the source(s).					
Establish ingress. Maintain the established primary and secondary boundaries and rally point at the site.					
Evaluate use of foam as a proactive tactic for vapor and/or fire suppression.					
Utilize 6 manned/unmanned fire monitors and other resources to apply water/foam to extinguish fire. Upon extinguishment of fire, continue applying water to the site and adjacent areas to ensure cooling and prevent re-ignition.					
Coordinate decontamination needs of the affected area, personnel and equipment.					
Continue to utilize available portable fire pumps and fire apparatus to assist firefighting efforts.					
Special Instructions					
Use proper PPE and maintain communications at all times.
